

NATIONAL **JUNE 28** LOGISTICS DAY

Share Your Appreciation #NationalLogisticsDay

Logistics plays an important role in the economy and our day-to-day lives. It involves the timely delivery of everything from food and medicine, to clothing, household goods, fuel and so much more.

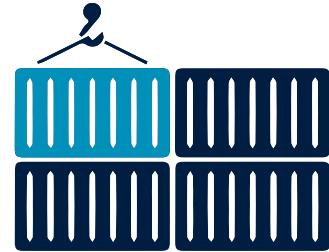

Rail is the **leading form of transportation** for shipments traveling 750 to 2,000 miles.

On an average, the air freight industry transports around **51.2 million tons of cargo in a year**, representing more than 35% of global trade by value.

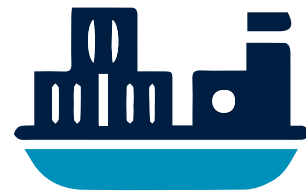

There are over 500,000 trucking companies operating more than **15.5 million trucks**

in the United States alone. Of this figure, 2 million are tractor-trailers.

There are currently over **20 million shipping containers** in the world, with 5-6 million of them currently being shipped globally on vessels, trucks, and trains. In total, these containers make around

200 million trips a year.

There are over **53,000 merchant ships** transporting goods around the world.
